MEMORANDUM FOR: Executive Director, NPIC

SUBJECT: Near-Real-Time Report

1. Attached is the task force report on Near-Real-Time Imagery due today. Because of the short deadline, we were not able to fully explore all avenues which might have proved lucrative. However, we hope that this report has layed the foundation for further study and evaluation of a rapidly approaching problem.

2. The task force received two background briefings, one from [REDACTED] and the other from [REDACTED]. We found these briefings to be extremely valuable and useful aids because they updated some of the information contained in the Inlow report.

3. I would like to bring to your attention the outstanding cooperation and support I received from the other members of the task force and the secretaries involved. They devoted their full time and efforts to achieving our established goals and at one critical point we retreated to the [REDACTED] to become completely immersed in the subject.

[REDACTED]

Chairman, NRT Task Force
